

BITNINJA

SERVER SECURITY

CASE STUDY
Ganesh Hosting

<http://www.ganesh-hosting.ch>

The Company

Ganesh Hosting is a Swiss webhosting company, based in the charming city of Vevey. They provide various hosting solutions (VPS, dedicated, cloud) with more than 14 years of experience behind their team.

Having such established partners like Morand Distillery and GroupeMutuel, quality is never contested. And the fact that they work with 100% green energy datacenters is just the cherry on top.

Challenges

Before they tried using BitNinja, they faced with all the common automated attack types all the industry is facing nowadays.

„Brute-force password guesses, code injections like PHP script uploads, spam attacks and vulnerability exploits made our and our clients' life harder.”

- Ganesh Hosting

No wonder, an average server gets ~ 1000 different attacks day by day and the majority of them work in auto-pilot mode.

Solution

„We got many attacks and tried many methods to block them, but nothing was enough. The BitNinja approach is the best we could find. The approach is cloud-based, it is very elegant solution to a global problem. Moreover, every protected server is used as a trap by BitNinja, which is an excellent idea.”

- Ganesh Hosting

As IT-security gets more of an emerging problem day by day, companies have two ways to fight the hackers. Either they develop an in-house solution or they choose an existing security solution on the market, it costs lots of energy and time/money.

That's why BitNinja is designed to cover all the major security issues with an easy-to-use, automated defense system for the hosting companies special needs.

Results

„Before we started using BitNinja, we had major problems, like: overall load went down during the attacks, we faced password hacks and PHP code injections. But with BitNinja, we experienced major positive changes: less hacks and reduced overall load on the servers.”

- Ganesh Hosting

Still not convinced?

Try BitNinja for free. Register to our **7-day trial** and enjoy the protection. In case of any question, please contact our team at info@bitninja.io. We are always happy to help.
